Advanced Accident Investigation & Reporting

INTRODUCTION

- In spite of all our best efforts, accidents and incidents occasionally occur. These unplanned or undesired events can adversely affect a company's work operations and may include work-related injuries, occupational illnesses, property damage, spills and fires. Critically, all incidents should therefore be thoroughly investigated demonstrating a proven company-wide process of efficiency and effectiveness linked to the Safety Management System (SMS). The more serious the incident the more extensive the investigation.
- However, even a minor incident or near-miss incident also requires a thorough investigation as this may reveal significant potential for a serious future incident should the conditions be left uncorrected. While incidents seem to happen for obvious reasons, there may be things that contribute to an accident which are not always immediately apparent. Attendance on this Health & Safety training seminar on Advanced Accident Investigation & Reporting will provide you with the confidence and necessary professionalism to enable a thorough Accident Investigation as soon as practicable after the event.

This training seminar will highlight:

- Why and Who conducts an Investigation?
- Investigation Methodology, the Essential Six-Step Process
- Characteristics of an Effective Incident / Accident Analysis Programme
- The Two Major Components that contribute to the Cause of an Incident
- Why Investigations must be Constructive, Professional, Credible and Timely
- Safety Management Systems on Promoting a Pro-Active Safety Culture

OBJECTIVES

At the end of this training seminar, you will learn to:

- Develop the knowledge and skills required to investigate all adverse events
- Understand the causes of accidents and ill-health
- Understand the elements that combine to form an accident
- Develop confidence & professionalism in investigating, interviewing & reporting
- Ensure all employees & contractors are aware of the SMS and 'Safety Culture'
- Apply the legal requirements and company procedures

TRAINING METHODOLOGY

- Participants to this Health & Safety training seminar on Advanced Accident Investigation & Reporting will receive a copy of a comprehensive manual, copy of all slides and handout material with a thorough explanation of all the related subjects covered by the seminar outline with the presenter utilizing a variety of proven learning teaching and facilitation techniques. Student participation, is encouraged with syndicate work, DVD material, case studies and assessments.
- This Health & Safety training course is designed to enable Safety Officers and others to understand the concepts of Advanced Accident Investigation & Reporting, how to successfully and professionally perform an effective investigation and to report recommendations to management to elicit improvements in HSE and therefore prevent re-occurrence.
- All incidents (including near misses) are thoroughly and professionally investigated by a trained and confident team
- Corrective action/s are determined that identify the root cause
