Global Sourcing Strategy & Smart International Procurement

INTRODUCTION

- The world of International procurement is a challenge and many of these challenges in the next 5 years will transform global sourcing. The globalization of the supply chain presents both opportunities and challenges like never before for procurement. These key challenges include OPEX, consolidation, digital transformation International Trade Agreements and the data opportunity. Over the next decade, procurement executives will need to take on more expansive roles within their organization. They will need to become guardians of the corporate brand, advocates for sustainable business practices and innovators who help develop new products and services.
- To be a smart practitioner, procurement personnel now have to be negotiators, strategists, mediators, data aggregators, and financial analysts. Procurement personnel who proactively address these issues will be taking a major step toward helping their organization prepare for the future. The Global Sourcing Strategy & Smart International Procurement course has been designed to guides procurement professionals through the complexities of Global Sourcing.

Participants attending highly interactive Global Sourcing Strategy & Smart International Procurement training course will develop the following competencies:

- Global procurement risk management
