Certificate in Strategic Management in the Oil and Gas Business

INTRODUCTION

- The oil and gas industries are going through a period of significant change. The outlook for oil and gas prices is volatile, difficult to forecast and subjected to pressures from alternative energy sources. At the same time the growth in global demand is coming from newly industrializing markets in addition to recovery in the more mature economic zones. This has major implications for upstream and downstream operations and for the type and level of investment that will be required over the medium term. These developments also have a direct impact on the closely linked petrochemical business.
- In summary, the oil and gas business will require a different strategic approach in the future. This high-level training course “Strategic Management in the Oil and Gas Business – Sustaining High Performance in a Rapidly Changing Market” will enable you to design and manage the new approach.

This training course will highlight:

- The changing structure and dynamics of the global oil and gas business
- Creating and implementing a robust business strategy
- Aligning and linking strategic and operational management
- How to implement strategic plans effectively
- Achieving strategic change in your organisation

OBJECTIVES

At the end of this training course, you will learn to:

- Analyse where the best opportunities will be found in the future
- Develop a highly focused strategy to take the best opportunities
- Concentrate resources and actions to sustain competitiveness
- Manage the key processes of strategy innovation and strategic change
- Create and lead an effective team to take the new strategy forward

ORGANISATIONAL IMPACT

In sending delegates to this training course, the organisation will gain the following benefits.

- improved organisational performance through better resource allocation
- Application of strategic thinking into all levels of the organisation
- Top management having more confidence in the decisions of its staff
- An integrated approach to decisions at strategic and operational levels
- Sharply focused views on the extent and direction of change required for success
- More effective programme and project implementation by managers

PERSONAL IMPACT

- Improved career flexibility and prospects
- Accelerated thinking speed and problem resolution
- Detailed understanding of the strategic impact of individual specialisms
- Improved leadership and teamworking capabilities
- Continuous improvement in applying leading-edge planning approaches
- Understanding of best practice in achieving strategic objectives

WHO SHOULD ATTEND?
