Supervisory Excellence in the Oil, Gas & Petrochemicals Industry

INTRODUCTION

“Competency Development for Supervisory Excellence in the Oil, Gas & Petrochemicals Industry”

- This Oil, Gas & Petrochemicals Industry training seminar has been specifically designed to develop the competency of supervisory personnel in the oil and gas sectors by equipping them with the knowledge, skills and understanding to achieve Supervisory Excellence in this critical, high hazard industry. It has long been recognized that the Supervisory level is the leverage that ensures that management decisions are acted on.
- On this Supervisory training seminar, you will learn about utilising management and leadership techniques to problem solve day-to-day problems and workforce issues, pro-actively delegate, provide clear communication and direction, effectively develop yourself and others, control your team, your work environment; as well as create a climate and culture for improved safety. This Competency Development for Supervisory Excellence in the Oil, Gas & Petrochemicals Industry training seminar is essential development for supervisors operating and working in the oil and gas industry.

This training seminar will feature:

- The Unique and Important Role of the Supervisor for organizational success and development
- Practical Analysis of risks, creative problem solving techniques to provide effective decisions
- Powerful Motivation and delegating skills to control teams
- Excellent Interpersonal and Communications Skills Techniques, as well as lead meetings and team briefs
- Developing People, Coaching Skills and Increasing Team Performance
- Methods in Achieving the Safety Culture and Target Zero

OBJECTIVES

By the end of this training seminar, participants will be able to:

- Understand the important role and responsibilities of a Supervisor in the organisation
- Determine effective problem solving risk identification and analysis within their working environment
- Apply powerful interpersonal techniques to improve communication in order to effectively delegate and control teams
- Apply development, coaching, mentoring and feedback techniques to increase optimum people performance
- Improve the safety climate and culture across the organisation through their attitude and actions

TRAINING METHODOLOGY

- This Supervisory Excellence in the Oil, Gas & Petrochemicals Industry training seminar will utilise a variety of proven highly interactive adult learning techniques to ensure maximum understanding, comprehension and retention of the information presented. This includes highly interactive facilitated group and individual exercises, industry relevant case studies, active scenario building, as well as specifically targeted videos. The instructor will also facilitate learning by encouraging the delegates to test and critically appraise any theories and concepts on the training seminar.
